

HONORED TO WIN. HONORED TO SERVE.

The California Awards for Performance Excellence recognizes manufacturing excellence and productivity. At Boeing, we're honored that our C-17 Program captured the only Gold-level award statewide. More importantly, we're proud of the entire C-17 team for its tireless commitment to ensuring that the C-17 is the world's foremost airlifter by any measure.

On April 29, the Boeing C-17 team accepted the 2002 Gold-Level California Awards for Performance Excellence (CAPE) United States Senate Productivity Award, which is the state's highest honor for California-based manufacturers. C-17 was the only gold-level winner in this year's competition and was also presented with the first-ever California Governor's Award for Performance Excellence. This ad ran in the Long Beach Press-Telegram to acknowledge the work of the C-17 team for this achievement.
