

## FROM HERE, WE CAN SEE A SAFER AMERICA.

On July 22, the first ballistic missile defense interceptor was loaded into its silo at Ft. Greely, Alaska. This milestone reflects important progress toward a fully deployed missile defense system and a safer America. Boeing is proud to salute the Missile Defense Agency and all those working to protect our nation and our allies on this special achievement.

*This ad, for Boeing Integrated Defense Systems, highlights an important milestone for the Ground-based Midcourse Defense program. Designed as a salute to the Missile Defense Agency on this achievement, the ad appeared in publications in Washington, D.C., key Boeing employee locations and select military bases.*
