

THERE'S NO STOPPING YOU NOW.

With the rollout of the new Boeing 777-200LR Worldliner, the longest-range commercial airplane in the sky, passengers will find it easier than ever to go where they want to go without stops, hubs or connections. New routes, new places, new worlds of opportunity. Just like that, it's all within your range.

On February 15, Boeing unveiled the 777-200LR Worldliner, the world's longest-range commercial airplane. With a range over 9,400 nautical miles, the 777-200LR can connect virtually any two cities with nonstop service. This ad showcases the unveiling event as an amazing achievement that will alter the way the world flies. On March 8, several weeks after this ceremony, the airplane made its first flight. The first 777-200LR is scheduled to be delivered to Pakistan International Airlines in January 2006.
