

ANOTHER FIRST FOR ITALY AND THE WORLD.

Today, we're proud to salute our customer and partner, the Italian Air Force, as we roll out the first Boeing KC-767A, the world's most advanced tanker aircraft. With its ideal size and proven platform, the KC-767A sets a new benchmark in aerial refueling—more capable, more deployable, and more efficient. We congratulate Italy and the entire Boeing KC-767A team for leading the world to the future of tanker technology.

This ad for Boeing Integrated Defense Systems celebrates the rollout of the first KC-767A Tanker for the Italian Air Force. The ad ran in select defense trade publications and features a photo from the official rollout ceremony on Feb. 24 in Wichita, Kan. Nearly 1,000 people, including customer representatives, dignitaries, supplier representatives, employees and media from around the world, attended the ceremony.
