

READY TO DELIVER UNMATCHED PERFORMANCE IN FREIGHT.

The new 777 Freighter is a powerful extension of Boeing's leadership in providing over 90% of the world's freighter capacity. In addition to more than 100 tons of payload, the 777 offers operators unmatched freighter efficiency and range. Enabling customers to fly more cargo to more places, more profitably. To take their freight business further every day.

*This ad will run in trade publications to mark the launch of the new 777 Freighter, the latest addition to the Boeing family of airplanes that serve the growing market for air cargo. The 777 Freighter leverages the proven features of the 777 — efficiency, economics and operational performance — to help customers meet the challenging demands of this sector. It further complements the company's current product lineup which includes freighter versions of the 737, 767 and 747.*
