AIRBORNE FOR ITALY AND LEADING THE WAY.

We're proud to salute the Italian Air Force on the first flight of their Boeing KC-767A, the world's most advanced tanker aircraft. More capable, more deployable, and more efficient, the KC-767A sets a new benchmark in aerial refueling technology. We congratulate Italy for flying first and leading the way.

This ad, for Boeing Integrated Defense Systems, celebrates the first flight of the first KC-767A Tanker for the Italian Air Force. The Tanker was displayed at the Paris Air Show in June and several press and customer briefings were held inside the aircraft. The ad ran in select Italian newspapers and international defense trade publications.
